From Woody McKenzie on fiddlehangout.com: "I just joined the hangout yesterday and uploaded a waltz I wrote called "Five Steps Down". You can check it out on my homepage or go to my website and see the notation with chords as well. I would be honored if you should be inspired to play it or pass it around. Some of my friends learned it and played it for me this past week at the Clifftop, WV festival and it has also been played for a wedding. I am just happy to share it!"

I learned this at our Monday night jam.
